

ELECTRICAL CONTRACTOR TIPS

This information serves as an important reminder to all electrical contractors operating within Eglinton Village regarding the regulatory requirements for notifiable electrical work under Regulation 51 of The Electricity (Licensing) Regulations 1991.

PRELIMINARY NOTICES FOR NOTIFIABLE ELECTRICAL WORK

Before commencing any notifiable electrical work, a Preliminary Notice must be submitted in compliance with the regulations. Failure to adhere to this requirement may result in a breach.

CORRECT NETWORK OPERATOR SELECTION FOR NOTICES

For all electrical work in Eglinton Village: Ensure that Eglinton Village Energy is listed as the Network Operator on all Notices. Important: Do **not** list Western Power as the Network Operator.

CORRECTING ERRORS IN SUBMITTED NOTICES

If a Notice has been mistakenly submitted with Western Power as the Network Operator: Log into the eNotice portal promptly to amend or resubmit the notice with the correct information.

EGLINTON VILLAGE ENERGY CONNECTION PROCESS

All applications must be completed through the Eve website. Western Power and Synergy are **not** part of the Eglinton Village network processes. Eve will coordinate the installation of the meter and the final connection to the power pillar. Eve will connect after the connection invoice/s has been paid and a Notice of Completion for the electrical work has been submitted and received.

DESIGN GUIDELINES FOR PERMANENT CONNECTIONS

Visit our website to see the [Design Guidelines for Permanent Connections](#). This page contains all the information you require for electrical installation.
